

## Customer Quick Start Guide

### **How to Log into your CDE Lightband Account Portal**

You can log in to your Account Portal and configure all the features that CDE Lightband Digital Phone Service has to offer by doing the following:

1. Go to: [http:// mycdephone.com](http://mycdephone.com)
2. For your username, it will be your 10 digit phone number (Example: 859-721-0028 without hyphens or spaces).
3. To obtain your password, click “Forgot Password” on the upper left side of the screen. A password will then be emailed to you. There will be a link provided in the email as well as a randomly generated password.
4. Enter this password into the appropriate field and click “Login”.

From the “Home” page, click “Features” to configure all of your phone features (e.g. Call Forward, Simultaneous Ring, etc.)

**Note:** When you log in for the first time, you will be prompted to enter a 4 digit CPNI Code of your choice. (CPNI is a security code used for verifying an individual customer’s identity before providing access to confidential and proprietary customer information).

### **How to Change your Account Portal Password**

When you log in for the first time, you will be prompted to change your password. Your new password must consist of 4-12 characters and cannot contain any spaces.

1. Enter the password provided to you on the original email in the “Old password” field.
2. Enter a password of your choosing in the “New password”, confirm your new password.
3. Click “Submit”

### **How to access your Voicemail**

1. Dial your 10 digit telephone number or dial \*62
2. The initial pass code is 4227.
3. Follow the voice prompts to set up your account.
4. To clear the message waiting indicator without erasing messages, dial \*99.

### **All Features are located in your Account Portal. Here are the top five features.**

- |                             |                         |
|-----------------------------|-------------------------|
| 1. Anonymous Call Rejection | 4. Speed Dial           |
| 2. Call Waiting             | 5. Voicemail Management |
| 3. Call Forwarding          |                         |

### **Anonymous Call Rejection (\*77)**

This feature prevents or allows calls from callers who have blocked their phone numbers from being identified. Blocked callers will hear a message notifying them that their calls are being rejected.

**From Your Phone:** To activate Anonymous Call Rejection, dial \* 77. To deactivate, dial \*87.

### **Call Waiting On/Off**

This service allows you to decide whether phone calls in progress can be interrupted by other calls.

**NOTE: This service is not available with all access device types.**

**From Your Phone:** To activate, log into your account portal click "On". To deactivate for individual calls, dial \*70 before dialing out.

### **Call Forwarding Always (\*72)**

The Call Forwarding Always service allows you to redirect your incoming phone calls to another number, such as a mobile phone or administrative assistant. Variations of Call Forwarding include Call Forwarding No Answer and Call Forwarding Busy. Unlike those services, Call Forwarding Always redirects all of your calls, not just those received when you do not answer or when you are talking on your phone.

**From Your Phone:**

To activate, and/or change options for this service, dial \*72 followed by the phone number that you will be redirecting your calls to. Your calls remain forwarded until you dial the deactivation code (\*73).

### **Speed Dial (\*74)**

This service allows you to associate single digit codes to frequently dialed or hard to remember phone numbers. To use speed dial from your phone, dial the speed dial code number, then #. For example, to call the number associated with Speed Dial Code 3, dial 3#.

**From your phone:** To begin programming Speed Dial Codes, dial \*74, the speed dial code number and the phone number that you will be associating with that speed dial code. For example, \*74 3 8595551212 programs Speed Dial Code 3 to dial 859-555-1212.

### **Voicemail Management: (\*62)**

This service allows you to specify how to handle your voice messages. You can retrieve voice messages by using your phone or you can choose to send voice messages directly to your e-mail address. Dial your 10 digit telephone number or dial \*62
